

I am writing regarding the FCCs introduction of the expansion of a new broadcast service known as Low Power FM. I understand that if this is allowed to happen current FM translators could be forced off the air. I listen to and support the radio station K-LOVE and do not want that station off the air. I believe it benefits the community I live in and know of many people who listne to that station.

I have children and feel that the music and programming on K\_LOVE is not offensive and I do not worry about what my children may hear when they are in the car with me.

I feel that the community is served by the tyoe of free community bullitens that are broadcast on K-LOVE. There is a positive impact on the public and communities served. Thank you for not removing this program.
